

Smelne Yachts - Stevens 1600 Dutch Steel Trawler

£ 1,225,081.60

Description

Stevens 1600 Dutch Steel Trawler - ST600 The Stevens Range of Dutch Steel or Aluminium Motor Cruisers is built from 12-16m in both Displacement and Semi-displacement models in a range of styles to suit your needs, Cruisers, Vets, Slingshots and Trawlers. Our yard based in Drachten Holland 'Smelne Yacht Centre' are custom yacht builders producing exquisite one-off yachts that are renowned for their quality of finish, and attention to detail and, above all else, are individually built just for you. The Stevens 1600 Trawler Cabriolet is a perfect example, designed and built with a low wash, smooth ride and minimal noise at cruising speeds in mind...you could believe she was electrically powered from the helm. This heavy displacement build has a low centre of gravity with T-shaped prominent and bilge keels designed to slow down the vessel's movement when underway. All the vessel's mechanical equipment, such as the main engine, generator and thrusters, are double insulated, so she is silent as she glides through the water. The Luxury Spec upgrades the vessel's equipment to the best of what is currently available and is always under constant review. This vessel can also be fully stabilised. Full detailed drawings and specifications are available upon request of all Cruiser, Vlet, Slingshot and Trawler models in our range.
